Here is some additional information on inexpensive chimes unit. Mr E P H James of Blue Sales has secured one which was made by the following company:-

Hu Tone Chimes Inc  
Third and Eggleston Avenue  
Cincinnati Ohio

This one sells for \$12.50 and, as would be expected from the price, its mechanism is not too reliable. The striking cycle is operated by a slow action solenoid with mechanical escapement - no dash pot - and it has stuck several times during operation. I believe a motor operated one would be more reliable.
